Communication Lab

The Communication Studies program has established and currently staffs a "Communication Lab" that provides individual and small-group instruction in all forms of public speaking and oral communication to the entire NSU community. It is structured as a supplemental training resource for students and as a support resource for faculty. Students and faculty can bring any kind of speaking project, at any stage of development, to the lab for personal consultation and instruction. Speeches, discussions, focus groups, research presentations, interviews, and press conferences are all examples of projects appropriate for lab work. For more information click [here](#).
