DEGREE AUDIT REPORTING SYSTEM

DARS HOME

Degree Audit Reporting System (DARS)

The Degree Audit Reporting System accumulates your data on general education requirements, major and minor requirements, transfer courses, course information and grade tables, your student records, approved exceptions and substitutions and other information to create a unique report showing your progress toward degree completion. A DARS audit offers up-to-date information showing coursework you have completed and what courses are needed to complete degree requirements. You may also run a what-if degree audit to see where you stand if considering a change in major.

You'll need to login with your NSU username and password in order to use this system.
