Galaxy of Stars

As a part of Northeastern State University's Sequoyah Institute, the Galaxy of Stars Series fosters cultural enrichment beyond the classroom, and promotes the experience and understanding of the fine arts through the presentation of national and international performing artists to our students and the community. Beyond entertainment, educational outreach events accompany each of the series performances. Beyond the Stage outreach events offer educational workshops, master classes and lectures. Learning LIVE outreach events offer daytime performances to area schools with accompanying curriculum guide resources to be used in the classroom. The Galaxy of Stars Series is a vital part of the educational experience offered at NSU.
