## MERLOT ELIXR PROJECT

September 17, 2009 - 4:45pm — wilsonla

Professor Rick Shelton and I worked for two years on a digital case study--From Memeographs to Podcasts. We tracked my efforts to transform ELED 4343 from a traditional class to one that utilizes technology. It also tracked my victories and defeats in learning the process of creating instructional podcasts. Professor Shelton and I video taped the interviews. Professor Shelton edited the entire project. He selected the music that plays at the beginning of each segment. Great song choice! I would be so happy for your to view this digital case study. If you wish to see the "closed captioning" feature, select the "cc" button. You will see NSU professors, NSU students, and former NSU students sharing information. I wish to thank Professor Shelton and everyone who participated and also supported this project. This was a wonderful collaborative project. I appreciate the contributions of everyone involved. MERLOT is a leading edge, user-centered, searchable collection of peer reviewed and selected higher education, online learning materials, catalogued by registered members and a set of faculty development support services. MERLOT's vision is to be a premiere online community where faculty, staff, and students from around the world share their learning materials and pedagogy. MERLOT's strategic goal is to improve the effectiveness of teaching and learning by increasing the quantity and quality of peer reviewed online learning materials that can be easily incorporated into faculty designed courses. The MERLOT ELIXR project is specifically focused case studies designed to be used as a model for other higher education faculty to follow.
