Quality Matters

January 24, 2011 - 9:23pm — Rick Shelton

Quality MattersTM is a collegial review process where reviewers provide
feedback on the course design in two ways:
1) awarding of points for specific review standards, and 2) providing
substantial, constructive, and specific comments
and suggestions with regard to both areas for improvement and existing
strengths. Reviewers are asked to take the
students' perspective with regard to clarity and organization.
The Quality Matters Rubric and review process are dynamic and reflect national
standards of best practice and the
research literature.

This is a short video on how to use Safe Assignment in Blackboard.
How Does it Work?
SafeAssign can be used in two ways.

1.Instructors can set up SafeAssignments in their Blackboard courses and let students submit papers to these assignments, in a way very similar to the one provided currently by Blackboard Learning System. As students submit papers, they are checked against SafeAssign's comprehensive databases of source material. The papers will then be delivered to instructors through the Blackboard Learning System together with the originality reports, with the results of the matching process, attached to them. >>More on Creating SafeAssignments
2.Instructors may upload papers directly with the Direct Submit feature, without student involvement. >>More on Direct Submit
Matching Process
SafeAssign checks all submitted papers against the following databases:

•Internet - comprehensive index of documents available for public access on the Internet
•ProQuest ABI/Inform database with over 1,100 publication titles and about 2.6 million articles from '90s to present time, updated weekly (exclusive access)
•Institutional document archives containing all papers submitted to SafeAssign by users in their respective institutions
•Global Reference Database containing papers that were volunteered by students from Blackboard client institutions to help prevent cross-institutional plagiarism.
SafeAssign Originality Report
SafeAssign generates an Originality Report with the results of the Matching process.

Adding a Test to Blackboard

February 8, 2010 - 2:17pm — Rick Shelton

To add a test go to:

1. Control panel
2. Pool manager
3. Import
4. Browse
5. Submit
6. Test manager
7. Add test
8. Name test
9. Submit
10. You are now at the test canvas

11. Creation settings
12. Scoring : (2 point s tests 1 and 2; 1.66 points for test 3)
13. Submit
14. You are now back at test canvas
15. From question, pool, or assessment
16. Go
17. Under pool choose the correct file
18. Check multiple choice
19. Assign point value
20. Search
21. Submit
YOU ARE DONE!!!

ELIXR Project Files

June 6, 2008 - 1:43pm — Rick Shelton

The exixr project file can be found here.

Introduction: Several professors and students/former students.

Early Years: Seems short to me. May need more footage to work with. Dr. Wilson only no footage of other professors or students.

Frustrations: Seems short to me. May need more footage to work with. Dr. Wilson only no footage of other professors or students.

"What if's": Several professors and two students. One student may not fit in topic.

Why Change? (ver. 1): Dr. Wilson only.

Why Change? (ver. 2):

Growing: TBD

EDUC 4823

May 13, 2008 - 10:06am — Rick Shelton

SWCOLT

March 4, 2008 - 2:30pm — Rick Shelton

The podcasts posted in this blog are for using windows Movie Maker as the recording tool. Podcasting is for anyone for any reason. It empowers you to literally reach around the world.

Session topics

  The basics of podcasting
  Finding appropriate published media
  Creating podcasts inexpensively
  Using Windows Movie Maker
  New online services and tools
  Standards-based tasks using online media
  Assessing student performance in podcast

The basics

  Podcasts are digital audio files available online for downloading or subscription
  Vodcasts have a video component
  Subscription capability necessary for true pod- or vodcasts
  RSS application makes subscription possible
  Listen on a computer or an MP3 player
  Podcasting software such as iTunes needed to subscribe
  Online directories list podcasts available
  Podcast or digital audio file creation is simple and inexpensive

Podcast
From Wikipedia, the free encyclopedia

A podcast is a collection of digital media files which is distributed over the Internet, often using syndication feeds, for playback on portable media players and personal computers. The term podcast, like "radio", can refer either to the content itself or to the method by which it is syndicated; the latter is also termed podcasting. The host or author of a podcast is often called a podcaster.

The term "podcast" is a portmanteau of the words "iPod" and maybe "broadcast",[1] the Apple iPod being the brand of portable media player for which the first podcasting scripts were developed (see history of podcasting). These scripts allowed podcasts to be automatically transferred to a mobile device after they are downloaded.[2]

Though podcasters' web sites may also offer direct download or streaming of their content, a podcast is distinguished from other digital media formats by its ability to be syndicated, subscribed to, and downloaded automatically when new content is added, using an aggregator or feed reader capable of reading feed formats such as RSS or Atom.

PED/HED 2202 Podcast Information

December 7, 2007 - 10:58am — Rick Shelton

Please follow the link below for general written instructions for creating a podcast. The podcast posted in this blog is for using windows Movie Maker as the recording tool.

How to Create Your Own Podcast - A Step-by-Step Tutorial

http://radio.about.com/od/podcastin1/a/aa030805a.htm

Podcasting is for anyone for any reason. It empowers you with a voice that can literally reach around the world.

In order to podcast you will need to learn a few skills in this order:

1. How to record your audio and save it to an .mp3 file.
2. How to create an RSS file which holds the "directions" for sending your file when a user's program like iPodder requests it
3. How to write the "directions" that are inside the RSS file
4. How to upload the RSS "feed" and your .mp3 file
5. How to validate that the file is written correctly and will send the file correctly.

NOMSTA Presentation Spring 2006

June 6, 2006 - 12:21pm — Rick Shelton

Expanding the Classroom:
To Infinity and Beyond

Technology today can quickly overtake a classroom with its complexity and the endless options available to the instructor. This seminar will address three key issues relevant to using technology intelligently in the classroom: how do we make sense of it all, what's good about it, and what's the downside? We'll take a brief look at a variety of popular media including websites, podcasts, and

online video. We'll then explore their use as instructional tools and discuss ways to avoid problems.
