Nursing Program

The Nursing Program offers an upper-division completion program for individuals already licensed as Registered Nurses, which leads to a Bachelor of Science in Nursing degree. Since its origin in 1982, our RN-BSN program continues to flexibly offer all RNs the opportunity to earn a professional degree.

All nursing courses are available online, originating from the Northeastern State University-Muskogee campus, or can be delivered every other week by Video-Conference (VC) to various distance education sites, e.g., NSU-Broken Arrow, Miami, and Ponca City. Consequently, you can tailor enrollment around your work, family, and other responsibilities. This is truly a program for the working RN.

Advisement and information is also available for the declared and non-declared pre-nursing students enrolled at NSU. Students are advised by appointment in room 109, Haskell Hall, which is located next to the John Vaughan Library. Please schedule initial appointments through the Nursing Office.

Before submitting a program application, be sure to contact us and obtain an unofficial transcript evaluation. We look forward to meeting you. You are invited to visit us in the Mike Synar Center, room 134, on the NSU Muskogee campus, call 918-781-5410 or fax 918-781-5411.
